

## DecodeLabs - Project 1: Data Cleaning & Preparation

| Change ID | Description                                                      | Impact                                                  | Status   |
|-----------|------------------------------------------------------------------|---------------------------------------------------------|----------|
| CR001     | Imputed missing "CouponCode" values using "No Coupon" as default | Preserved all customer records                          | Resolved |
| CR002     | Removed duplicate rows across entire dataset                     | Removed X duplicate rows (replace X with actual number) | Resolved |
| CR003     | Removed duplicate "OrderID" entries to ensure unique identifiers | Preserved only unique orders, ensured data integrity    | Resolved |
| CR004     | Corrected "Date" format to ISO 8601 standard (YYYY-MM-DD)        | Standardized all 1200+ date entries                     | Resolved |
